

SiteToolSet.com Launches www.puresense.com

Dallas, Texas – October 5th, 2009

SiteToolSet.com is proud to announce the launch of the new Irrigation Management solutions web site www.puresense.com. This site is built on DotNetNuke and utilizes several of our DotNetNuke modules which have been customized to for PureSense. We worked closely with our partner, Red Barn Software, to develop and launch the new web site.

Key project tasks included:

1. Our team worked with the clients designers to implement the DotNetNuke skin
2. We built a custom registration form that integrated into an external database
3. We developed a custom events module to make it easy for them to manage and publish events on their new DotNetNuke web site as well as on other external web sites
4. We used our Forms Engine Module to create several forms on the web site

SiteToolSet.com is focused on building powerful and effective web solutions based on DotNetNuke. Combining our strong library of skins and modules along with our talented DNN developers, we create e effective solutions for our clients.
