

SiteToolSet.com Launches Wizurt.com (<http://www.wizurt.com>)

Dallas, Texas – December 3rd, 2009

Social Networking has become a core competency of our company and www.wizurt.com had been launch with a custom Web 2.0 design and custom DotNetNuke modules. We leveraged the DotNetNuke content management system framework along with custom modules to build this social networking site. Our custom development included using our category module, which was tailored to fit the needs of www.Wizurt.com. This site will specialize in blogging, under specific categories in which users can contribute content.

From the design to the profile specific questions, to the Hottest Categories of the day, each aspect of this website shows off the capabilities of our customizable Category Module that offers administrative ease of use, while fitting into any design and skin.

Contact SiteToolSet.com today and we will help provide solutions to for your website requirements, today!
